Short Essay on Saving Earth | Save Earth Save Live Essay

Earth is the only planet in the whole universe that provides suitable conditions for the existence of living beings. The earth contains all the natural resources which are needful for the presence of living beings on it. Earth has the environment and climatic conditions suitable for the life of living beings. No living being can not live with water, air, and food where these contain only on Earth. However ever humans use all the natural resources in useful and harmful ways. Now it had become a big issue for the present world due to the increase in harm to Earth and its resources. By this it resultant to Save Earth by the selfish usage of human beings. The resources like water, pure air, soil are polluted to a certain extent and there is still a chance to cover the damage that happened to the earth and resources. Over usage and over demand of the needs for the lives to sustain on earth lead to endangered of resources. It's very difficult for human beings to live without the natural resources of Earth.

The rapid use of resources gave rise to Save Earth to continue the lives on Earth to further generations. The saving of Earth will provide a smooth life and a healthy environment to flourish the generations forever. Using resources according to needs and saving them further without polluting the resources. To Save Earth and Save lives there are ample ways to save and cover the damage that happens in the past. Some of the ways are planting trees, eco-friendly usage of natural resources, less production of plastic and other harming products, etc. These ways can help to save Earth and the environment for continuous generations.

Save Earth Long Essay | Essay on Saving Mother Earth.

Resources and Earth are valuable gifts and also essential things for the life of living beings. Earth was included with all the resources and the needs of living beings to exist in their lives. Essential resources like Air, water, Soil, Food, and many more are provided by the Earth and its Environment. Earth had adaptable climatic conditions for living beings and also helps in improving the generations in it. From the past by providing the resources or needs for human tends to exhaust resources. Humans by their greed started developing the needs in all the harmful ways of the Environment and Earth. However, all the activities and needs of humans bought up the Save Earth scenario.

Cause of Save Earth

There are several reasons for the Cause of Save Earth in today's world. As the resources are flourished and rich by helping the humans from the past year and generations. The needs of humans trends to increase, easy and fast bring up the industries by the development of human beings thinking. The present world was running with the population the needs of human got increased and leads to scarcity of human needs. The development of humans causes pollution in the environment and damaging of environment and the earth. All the resources like Soil, water, Air, Trees, Climatic conditions, and many more are got polluted which are parts of the earth.

All the activities by human beings done by greed and selfishness cause heavy damage to the environment. Resources like Air are getting polluted by the industries and vehicles parallelly water is polluting by mixing of untreated sewage and improper usage. Deforestation leads to rising global warming and climatic conditions and heavy usage of chemicals tends to soil pollution. However, Saving Earth means bringing up the previous earth and its climatic conditions back. All the polluting activities and greediness of human beings cause to Save Earth for further generations.

Effects Cause to the Environment

All the polluting activities that damage the Earth and its environment will directly affect living beings and generations. Pollution leads to scarcity of natural resources and these are essential resources to live the life of living beings. The effect can be obtained with an imbalance ratio of the need for resources to demand the resources. Further generations of living beings cannot exist without saving Earth and its resources. Human beings should start saving resources and maintain proper utilization without polluting will help the next generation. Present maintenance of the Ecosystem and Environment will make further generations flourish forever.
